SUMMARY

Informatic Engineering graduate with experience in web development, data analysis, and machine learning. Highly skilled in Django, Python, and SQL. Worked on projects involving large language models, computer vision, and natural language processing. Seeking Research and Development (R&D) opportunities in applied AI systems

EDUCATION

Bachelor of informatic engineering | Wadi International University (SYRIA) 2020 - 2025

- Coursework included web development, databases, data analysis, machine learning, and computer vision.
 - Graduation Project: Stock Price Prediction Using Sentiment Analysis of Financial News — Developed a predictive model integrating natural language processing and time-series data, and deployed it through a web application.
 - All academic projects were implemented and presented as interactive web applications.
-

PROJECTS

Stock Price prediction through news sentiment analysis June 2024

- Created a predictive model using Tensorflow to analyze historical stock prices and Utilized Transfer learning to perform sentiment analysis on the news headlines.
- Developed a simple website using HTML and CSS to display the predictions.
- Successfully predicted the stock prices with an accuracy of 70% as a part of my graduation project.

Attendance System based on face recognition September 2023

- Developed a Desktop Application using Keras and Tensorflow to Implement a Siamese neural network for face recognition.
 - Utilized Kivy Framework for the application interface and integrated excel for data storage.
 - Achieved an 87% accuracy in recognition as part of a university project.
-

SKILLS

- **Soft Skills :** Communication Skills, Problem Solving, Critical & Analytical Thinking, Time Management, Leadership.
- **Programming Languages:** Python, SQL.
- **Web Technologies:** HTML, CSS, Javascript.
- **Machine Learning Libraries:** Scikit-learn, Tensorflow, Keras, Pandas, Numpy.
- **Data Visualization:** Matplotlib, Seaborn.
- **Tools & Technologies:** Git, Jupyter Notebook.

CERTIFICATIONS

- **Mini Diploma In Data Analytics (2025)**
Syrian Youth Assembly Academy.
 - **IBM Data Analyst specialization (2025)**
Coursera.
 - **DeepLearning.AI TensorFlow Developer Specialization (2024)**
Coursera.
-

LANGUAGES

- **Arabic:** Native
 - **English:** IELTS(6.5)
-
